

Smart is the new power

Smart outdoor camera

Tycam: keeping an eye on your security

Stay connected, wherever, and whenever

Secure subscription-free connection

Are you looking for reassurance? Would you like to be able to keep an eye on the exterior of your home? Your outdoor camera sends you high quality videos on demand. Your data is secure and stored via an encrypted SD card, at no monthly cost.

Live stream with recording

Day or night, you are guaranteed to have a perfect view of whatever is happening outside your home, thanks to the camera's long range; even in complete darkness.

Intruder alert notification

Remain calm: your camera keeps watch and notifies you via your smartphone or tablet in the case of an alert.

A robust camera

Detection

The advantage of fitting an outdoor camera with an integrated motion detector is that it can warn you of any anomaly in a courtyard or garden, well before any attempt is made to actually break in to your home.

Monitoring

The camera remains operational 24 hours a day and 7 days a week. YOU can perform a spontaneous check or playback downloadable recordings stored on the on-board encrypted SD card at any time.

IP 67

It's index of protection rating of 67 ensures complete resistance to dust, water and extreme temperatures (-30° to +60°C)

Adding a sealed connection terminal (BRE), enhances the camera connection's protection from bad weather and vandalism.

See and hear while respecting privacy

The camera needs to remain discreet to protect personal intimacy: a simple click is all that is required to deactivate image broadcasting.

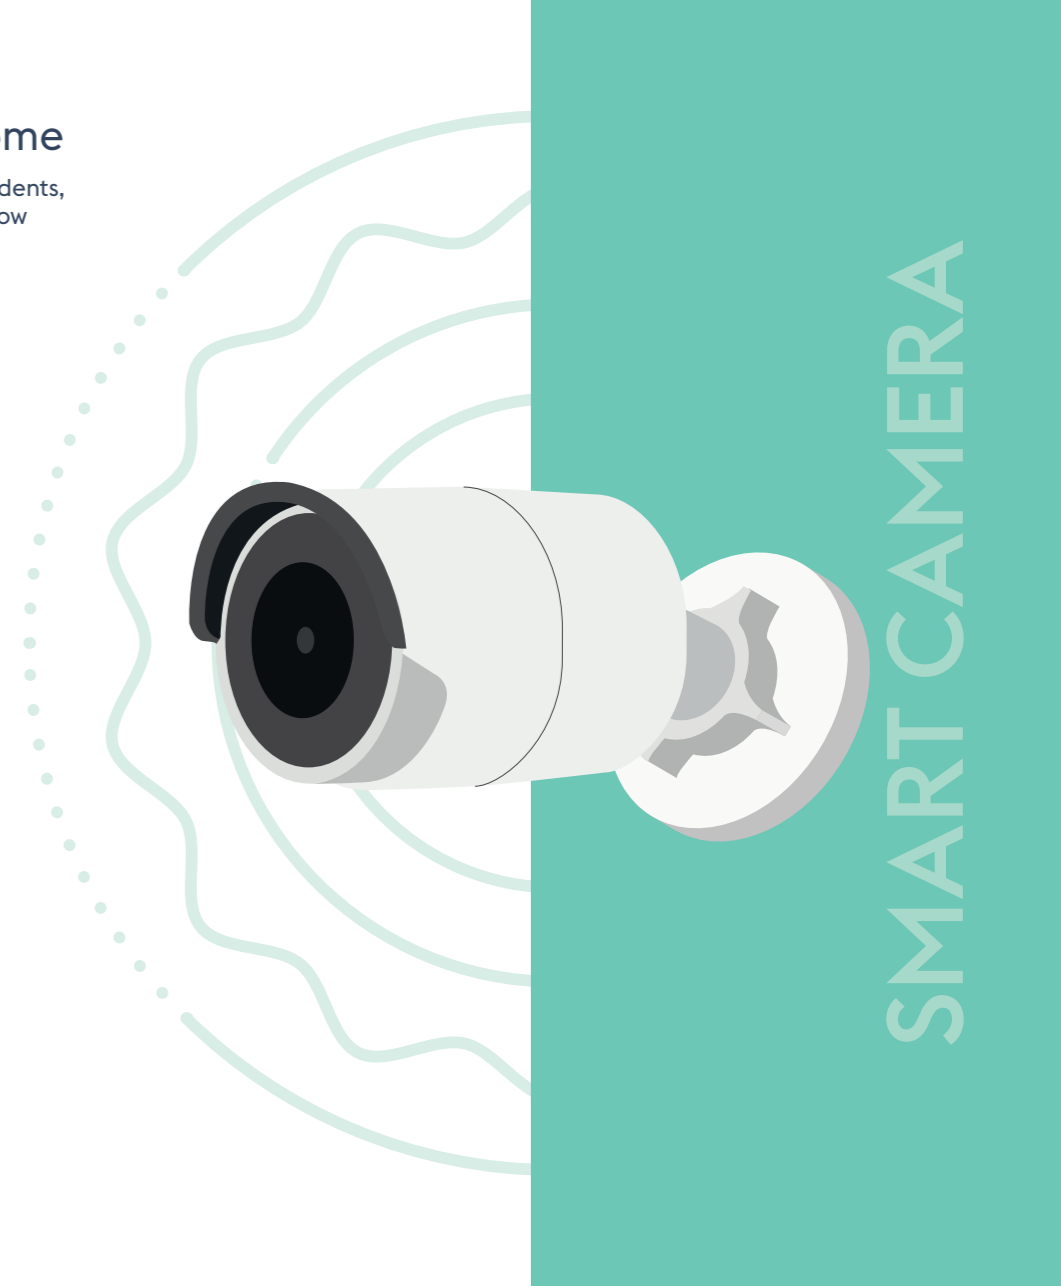

Upstream protection for your home

The outdoor camera protects and secures assets and residents, and in the case of any anomaly it can raise an alert to allow immediate action

Ensure your outdoor assets are also protected

Do you have expensive garden machinery, or an outhouse? No need to worry, the camera will keep watch over it.

DAY

FULL HD quality

Full HD images up to 1080p for optimal resolution and image clarity. H265 encoding to ensure unparalleled image quality, for a perfect view.

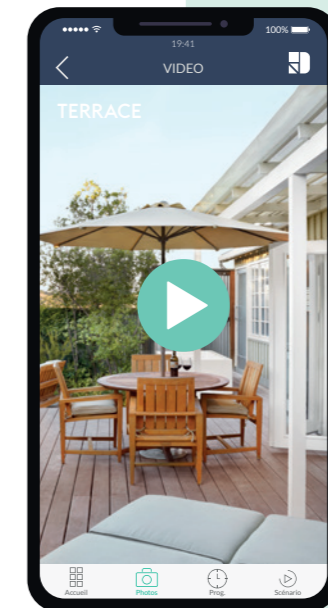

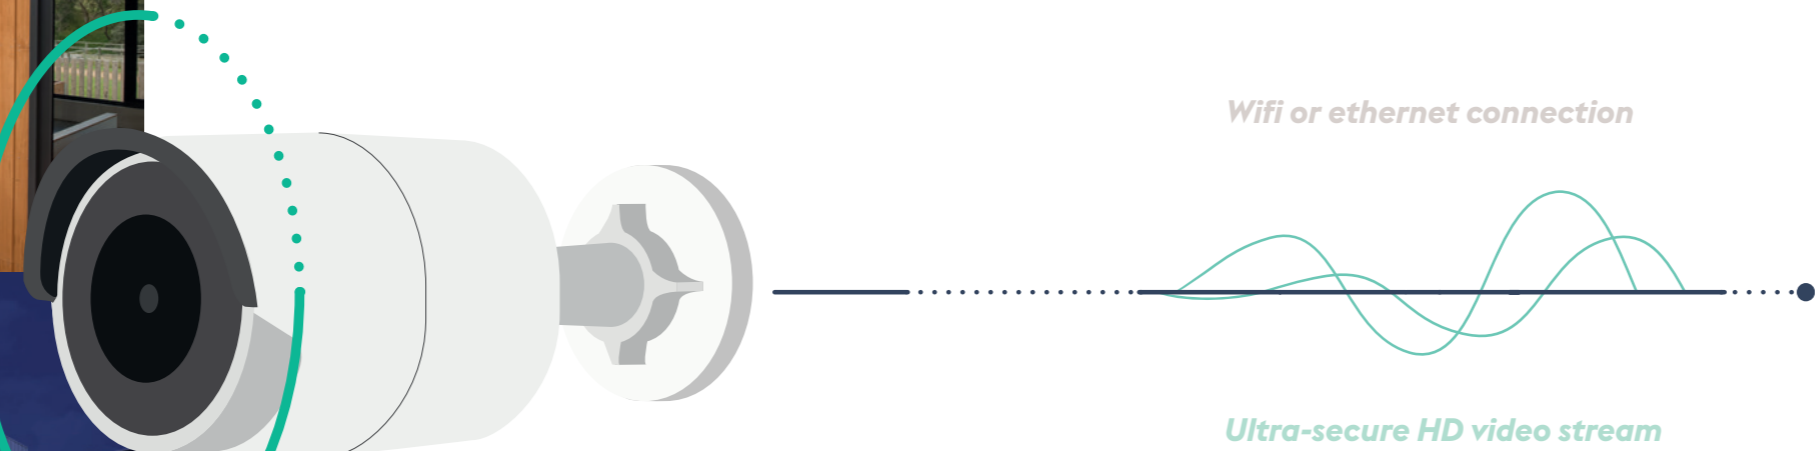

NIGHT

Large field of vision

With a viewing angle of up to 130°, enhanced night vision of up to 30 metres, even in complete darkness, and 4x zoom.

A camera with professional technology

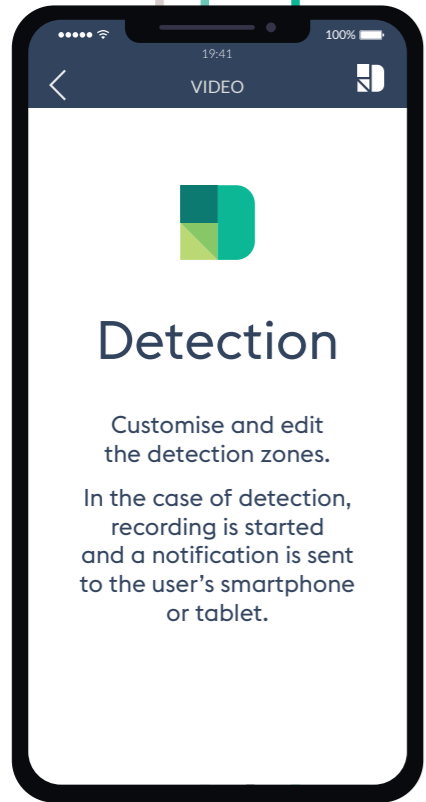

Supply via Ethernet cable (POE) or Mains supply (240v)

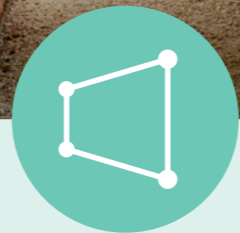

You can download your videos at any time

On-site video storage on an integrated 16GB encrypted SD card

Motion Detection
Motion in the selected zones activates an alert

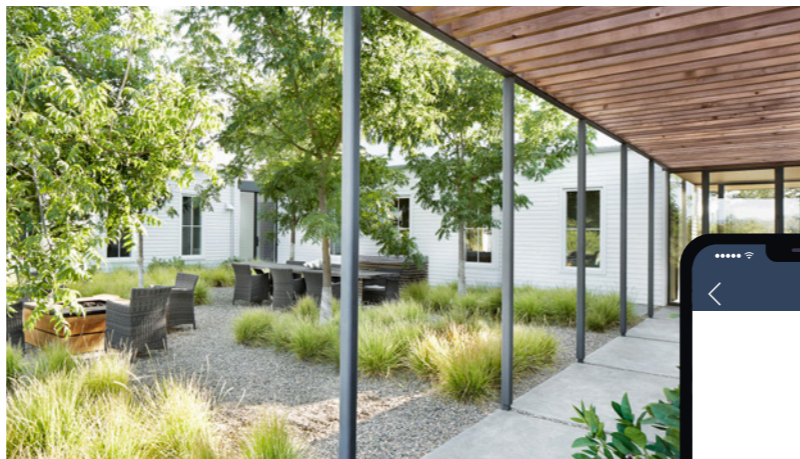

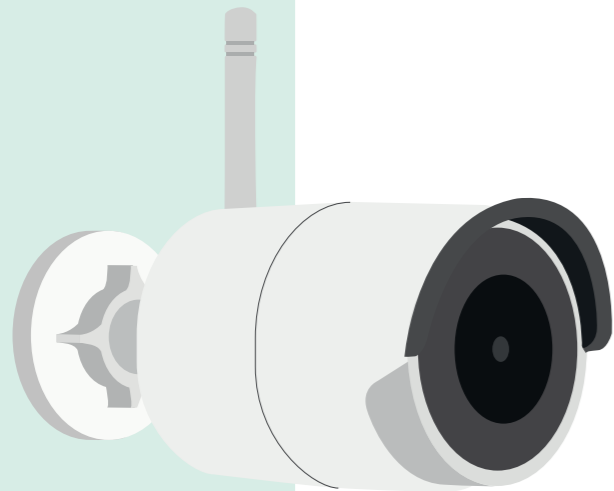

Intrusion zone
An alert is sent when an element enters the defined zone

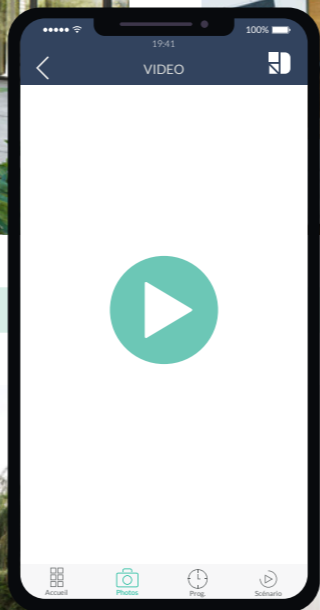

Crossing line
If this line is passed, an alert is also sent

outdoor

connection of up to

8 cameras

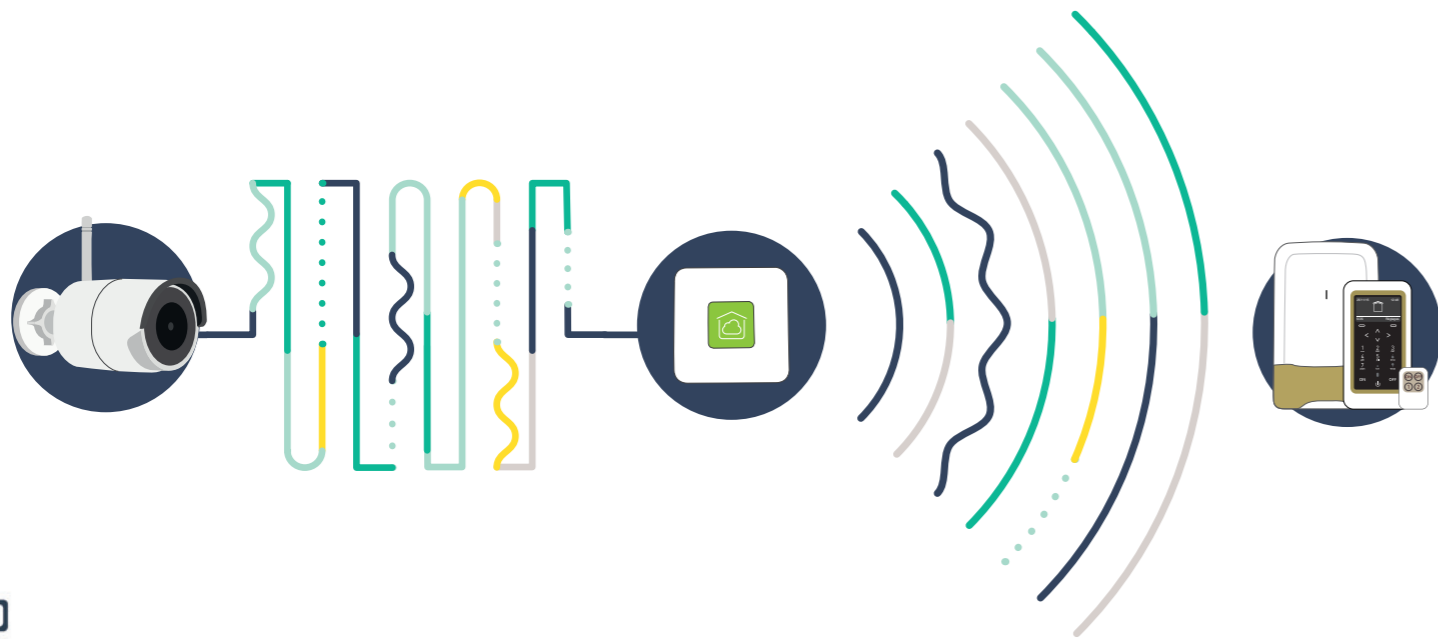

indoor

A camera, the first step toward providing security for your family and your assets.

Inseparable from the Tycam camera, the Tydom hub and its application provide the user with a link to their home, wherever they are.

- The outdoor Tycam camera has been designed to reassure and protect you.
- It is very easy to update and upgrade your system with Tydom
- For example, you could add a Delta Dore Tyxal+ Alarm System for optimum protection.

Associating the camera with Tydom is made simple with the QR code

The key to controlling your smart home

The Tydom hub allows you to control a wide range of other smart products around the home, and it allows the smart home system to evolve over time.

Important: The Tycam camera is compatible with Tydom hubs that have already been fitted.

Heating, lighting, alarm, roller blinds, gate, etc.
